Genuine Cummins HPI injectors are designed to provide the best performance and fuel economy for ISX engines.

The HPI injector is an electronically controlled injection system currently used on Cummins pre-2010 ISX15 engines. Its open nozzle system provides higher injection pressure (up to 35,000 psi) than previous designs, making combustion more efficient and resulting in better engine performance, fuel savings and lower emissions. Genuine Cummins HPI injectors are tested and validated to meet the strictest EPA emissions standards.

Genuine Cummins HPI injectors meet exacting Cummins specifications, utilize the most advanced materials, and incorporate the latest state-of-the-art Cummins design technology. At times, non-genuine injectors may look similar to Genuine Cummins injectors, but there are several key differences in quality. Non-genuine injectors oftentimes don’t meet Cummins stringent specifications, and using them in a Cummins engine may cause reduced engine performance, damage to other engine components, excessive smoke, and even reduced fuel economy, which continuously impacts your bottom line. Non-genuine injectors may also consist of inferior, obsolete materials and use out-of-date technology, which can cause cavitations and lead to premature engine failure. In addition, non-genuine injectors often fail to meet EPA emissions standards.

Uptime is always critical, so don’t take the risk of using non-genuine injectors. Genuine Cummins HPI injectors are built to meet or exceed the engine’s original specifications for performance, reliability, and durability. They include the latest upgrades in materials, component design, and workmanship. When you replace the injectors on a Cummins engine with Genuine Cummins HPI injectors, you aren’t just replacing a worn part – you’re improving the performance of the engine and equipment.

Genuine Cummins HPI injectors also come with a full Cummins warranty and are backed by our worldwide parts and service network.

**Cummins Warranty**

**ReCon® PX Injectors**

2 years/125,000 miles

Includes Labor, Progressive Damage and other Claimables

From better performance and reliability to unmatched warranty and service support, Genuine Cummins parts add genuine value. Contact your local Cummins authorized dealer or distributor for more information on Genuine Cummins HPI injectors.
