

Change to Default Parts Catalog View in QuickServe Online

In September 2018, we kicked off an effort to migrate users from QuickServe Online to parts.cummins.com, the next generation of parts catalogs. After receiving multiple improvement opportunity voices for parts.cummins.com, we slowed the original migration plan.

We have now implemented the improvements, performed an additional voice of customer with key stakeholders and analyzed the voices to determine that all required functionality is now in place. For more information, all current and legacy communications regarding the migration are available [here](#).

On **April 15**, all users who click on the Parts Catalog tab within the QSOL Parts tab will see a new landing page replacing the default catalog view. This new landing page will allow users to go directly to parts.cummins.com.

Here is an example of what the screen will look like:

The legacy option and system views **will remain** a click away as we work on migrating users to solely using parts.cummins.com. The profile setting for swapping the default catalog view will also be disabled.

When we migrate a user group, the legacy catalog views **will no longer be displayed** on QuickServe Online.

The order of migration will be as follows:

| User Access Group | Target Date |
|---|----------------|
| Limited Owners Plan (LOP), Unlimited Owners Plan (SIR) and Parts Only | April 22, 2020 |
| Factory Employees, Supplier, Contractors and Joint Ventures | May 13, 2020 |
| Fleets, Customer In-House Repair/National Accounts, VoTech and OEMs | May 20, 2020 |
| Dealers | June 03, 2020 |
| Distributors | June 17, 2020 |

Once the migration is complete, here is a sample of what the screen will look like:

The screenshot displays the Cummins QuickServe Online interface. At the top, the Cummins logo is on the left, and the QuickServe Online logo is in the center. On the right, there is a user profile section for 'pwc_demo (Limited Owner/Limited Owner)' with links for 'My Profile', 'Shopping Cart', 'Contact Us', and 'Logout'. Below the header is a navigation bar with tabs for 'Parts', 'Service', 'My Profile', 'Products', and 'News'. The 'Parts' tab is selected, leading to the 'Engine Parts Information (45454546 - 4B3.9)' page. The page has a sub-navigation bar with tabs for 'Parts Catalog', 'Dataplate', 'Emissions Catalog', 'Campaigns', 'TRPs', 'ATCs', and 'Related Information'. The 'Parts Catalog' tab is active, showing a 'NEW PARTS CATALOG VIEW' message. The message text is: 'The parts catalog has moved to parts.cummins.com. Use parts.cummins.com for all your parts research as the legacy parts catalog views *will be removed from QuickServe Online*. Both legacy views are available along with all the catalog information found previously within this tab. Any tools in the other Parts tabs will not be removed until the transition of the tool is completed. A quick link back to QuickServe Online will be available in the upper right corner of parts.cummins.com for easy navigation between the two sites. For more information on this transition, please read the article dated March 31, 2020 in the [News](#) tab.' The left sidebar contains 'My Engines' and 'Generator Set / Alternator Content' sections. The 'My Engines' section lists five engine serial numbers, with the first one, 45454546, selected. The 'Generator Set / Alternator Content' section includes a search field for 'Content for Serial Number (SN):' and a search button, along with current plant, model, and spec information.

Along with the Parts Catalog tab changes, the Emissions Catalog and Dataplate within the Parts tab will also be removed during the migration as they have fully transitioned to Parts.cummins.com.

To assist during and post migration, training and previous communications are available [here](#). We understand that change can be a challenge and appreciate your support during the migration.
